

# NATURAL RESOURCES

COMMITTEE • DEMOCRATS  
RANKING MEMBER, EDWARD J. MARKEY

The Natural Resources Committee Democrats have launched a new Energy App for the iPad, called “eVIZ.” This app is a powerful new tool for communicating on **domestic energy, gas prices and climate change**.

Download it to an iPad or iPad Mini here:

<http://democrats.naturalresources.house.gov/eVIZ>

Share the Energy App with your constituents. It’s free, and can be included in your next newsletter, email blast, posted on your website or shared via Facebook and Twitter (#eVIZ).

The Energy App is ideal for town hall events, and a great way to show House Democrats’ commitment to cutting-edge technology and innovation.

From Ed Markey & NR Dems: **DOWNLOAD NOW**

**Extreme Weather & Climate Change:** An animated look at the costs and scope of extreme weather events, including Hurricane Sandy, droughts, wildfires and floods.

**Gas Prices/Fuel Economy Calculator:** Show your constituents how much they will save at the pump thanks to Congress boosting fuel economy standards.

**The Energy Visualizer:** An interactive 3D map of the United States enables you to see energy consumption and production for wind, solar, natural gas, coal, oil, and hydro. Break down the information by state, while learning about efficiency and energy trends over time. You can even create state-by-state comparisons and set up multiple variables for looking at energy data in map or graph form.

The [Natural Resources Committee Democrats website](http://democrats.naturalresources.house.gov) (democrats.naturalresources.house.gov) features a page with all the information you need, including a [short video](#) about the app, buttons for your webpage, and graphics that can be shared on social media.

If you would like a demonstration of the Energy App, or would like to learn how to use the app for your next town hall event, please contact Jeff Sharp on the Natural Resources Committee staff at (202) 225 6065.
